

climate resilient development VISION: A world on a path to zero carbon and

Ambition

Strengthen Climate Pledges towards the SDGs

UNDP Climate Promise | Over 100+ countries enhance NDCs, with demonstrated increase in ambition

2019 - 2021

Acceleration

Scale up Climate Action to deliver Impact on the Ground

greener, more resilient & prosperous

Clean energy | 100 m more people have reliable and affordable access to clean energy

Climate Change Portfolio | 140+ countries with access to USD 3 billion+ in grant financing (vertical funds, bilaterals)

2019 - 2030

Mobilization

Engage all actors to collectively take ambitious climate action

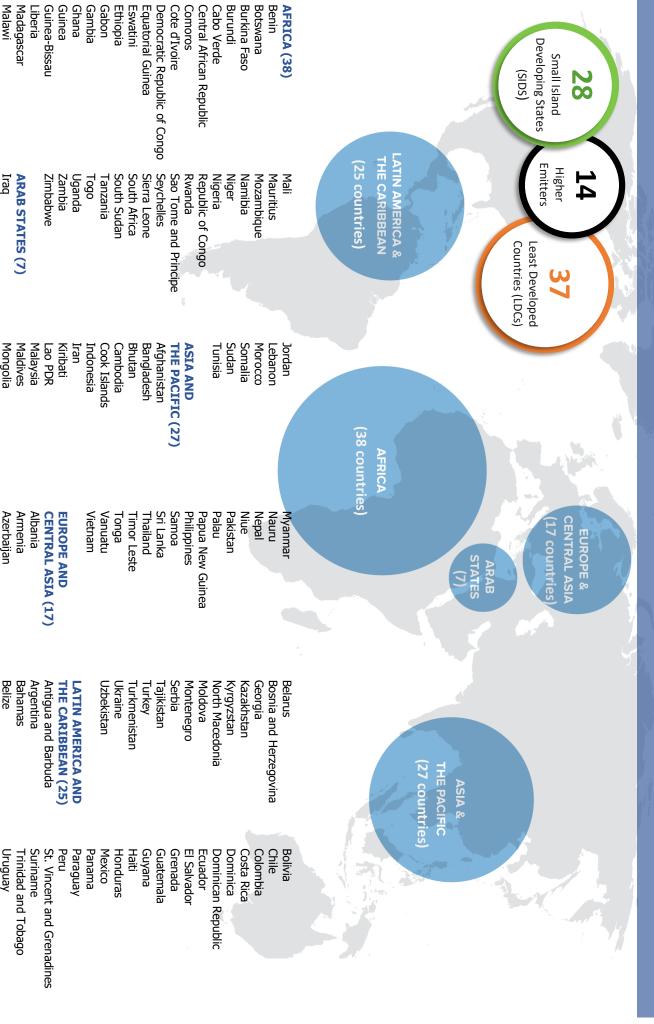

Outreach | Making all voices heard, including youth, women, and marginalized communities

2019 Onwards

UNDP's Climate Promise is the largest global offer on NDC enhancement, currently supporting 114 countries across the world

Climate Promise Support Across Five key service areas

Backed by an in-depth analysis on the hurdles that countries face to enhance and implement NDCs

The Climate Promise is being delivered in close collaboration with the NDC Partnership over 29 key strategic partners, including and as a contribution to

European Bank

SNY

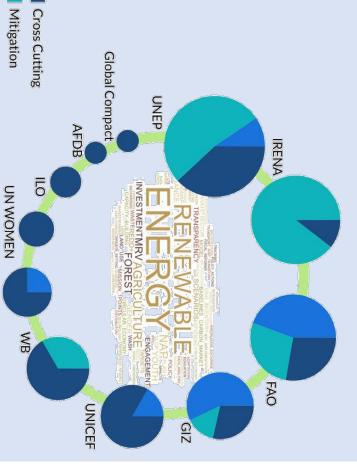

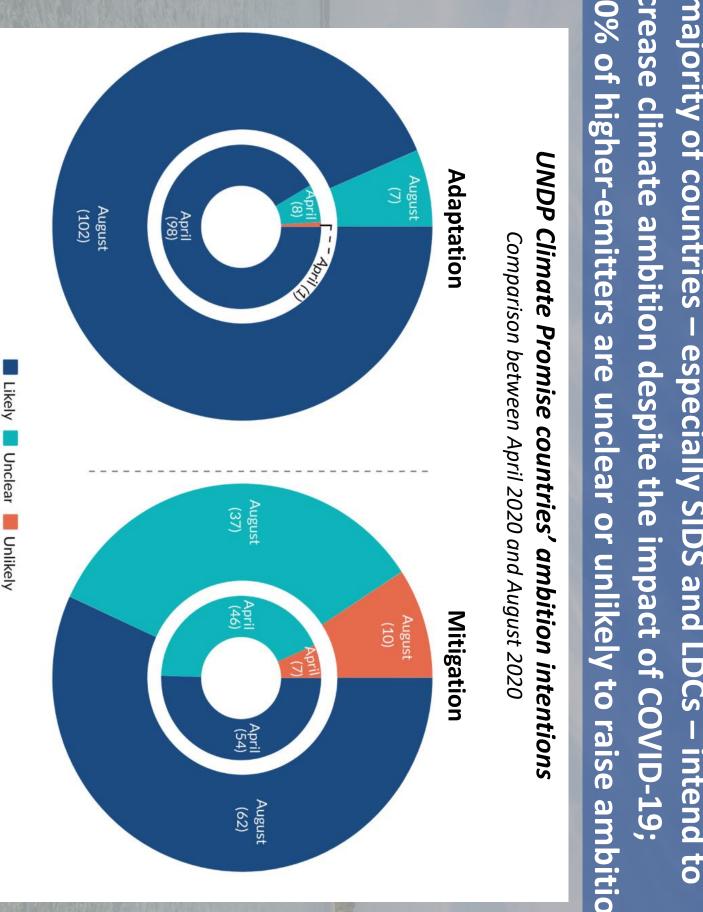

Adaptation

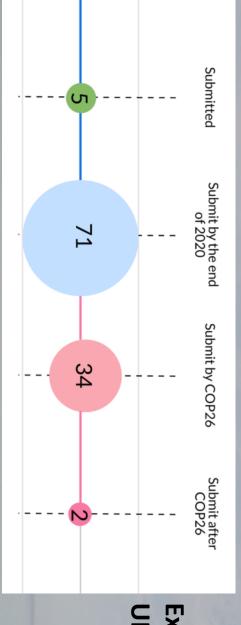

Partners jointly delivering Climate Promise activities, by issue

A majority of countries — especially SIDS and LDCs — intend to ~80% of higher-emitters are unclear or unlikely to raise ambition increase climate ambition despite the impact of COVID-19;

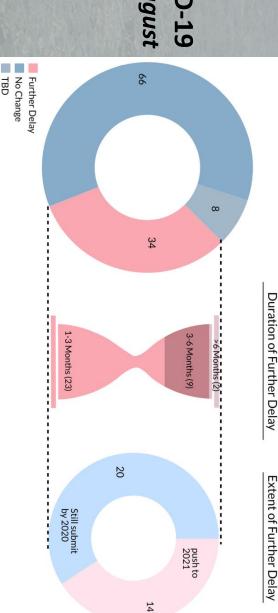

ahead of COP26 Over 60% of countries plan to submit by end of 2020, yet this number is rapidly declining. Most countries still plan to submit

sectors addressed in enhanced NDCs under the Climate Promise Energy, agriculture and forest/land use are the most common

Nearly one-third of Climate Promise countries are linking NDCs and green recovery, including a majority of higher-emitters (64%)

Sample activities include:

- Integrating NDC-related assessments and covid-19 related socio-economic impact assessments
- Aligning and integrating NDC measures and strategies with COVID-19 recovery plans
- Aligning Climate Finance and Recovery Finance
- Strengthening capacities and coordination between Ministries of Finance and Environment
- Carrying out assessments of green job opportunities of NDC measures

In support of the SG's Recover Better Principles

94% of Climate Promise countries are prioritizing political will and societal ownership as part of their NDC enhancement Enhanced NDCs aim to be inclusive and country-driven:

NDC and related financial mechanisms

Walaysia: National Youth Survey which will feed into the updated NDCs

commission on climate change and coordinating an NDC revision unit, including high-level advocacy

thematic briefs and internal portal and dashboard enhancement under UNDP's Climate Promise, including webinars, Extensive resources have been developed for supporting NDC

In collaboration with UNFCCC, a Quality Assurance Checklist for Revising NDCs

and ambitious NDCs was developed to help pursue robust

QUALITY ASSURANCE CHECKLIST

Determined Contributions For Revising Nationally

The quality assurance checklist is designed to support governments, civif society, and other stateholders to reflect on the western processes and extreme of their Nationally Determined Contributions (NDCs). The public questions are demond from the Peris Agreement, the IPCC Special Report on Warming of LSC, and on NDC design, revision and imple

This checklist outlines three dimensions that UNDP considers essential for ambitious and robust NDCs.

Country ownership and inclusiveness: the engagement of society and political stakeholders at all levels

during the revision process, and the inclusion of engagement

- Robustness and ambition: the clurby, transparency, and understanding of mitigation and/or adaptation components, cross-cutting issues communicated, and the enhancement of key targets and measures in
- Feasibility: key enabling conditions for implementing NDCs, i.e., finance mobilization, technology transfer
- and Institutional capacity building.

replace) the official guidance related to NDCs contained in the relevant UNFCCC decisions. Given the onally determined nature of NDCs, each country has its own starting point and will define a unique

uide for consideration throughout NDC revision and implementation. lthough the elements are not mandatory for countries to include in their NDCs (e.g. adaptation nication), or may be communicated in other reporting mechanisms, this checklist offers a helpful
