

Assessing and Reporting Climate and Sustainable Development Impacts of Mitigation Actions and Policies under the Paris Agreement

February 3 | 4 p.m. Manila | 5 p.m. Tokyo | 9am CET | Virtual

Register [HERE](#)

Policies and projects promoting sustainable development, including the use of safeguards to avoid negative impacts, can increase stakeholder support and public acceptance, increase market value, and raise climate action ambition.

The awareness of integrated solutions to climate change and sustainability challenges is growing due to the development of new SDG assessment tools that can help identify how projects and policies can maximize benefits and avoid or mitigate negative impacts.

This webinar will help expand this awareness further by offering policymakers and others stakeholders with an introduction to existing and new SDG assessment tools at the project level in Asia.

AGENDA

MODERATOR:

Karen Holm Olsen
Senior Researcher
UNEP DTU Partnership

OPENING REMARKS:
