Green Climate Fund (GCF) project implemented by the Copenhagen Climate Center of the United Nations Environment Program (UNEP-CCC) "Technical guidance and support for conducting Technology Needs Assessments (TNA) of sectors and developing a Technology Action Plan (TAP) in the Kyrgyz Republic"

Analysis of Private Sector Stakeholder Capacity Building Pre-Workshop survey on Launch event of the Technology Action Plans and working sessions to develop Concept Notes for the GCF

The date: 09/11/2023

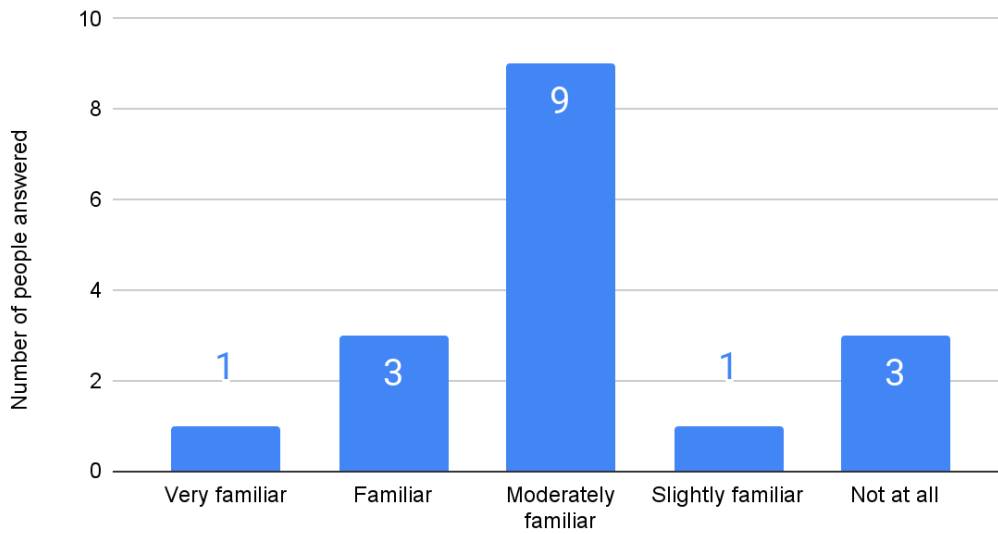

Venue: Conference Hall "Ala-Too" of the City hotel (address: 34/1 Baitik Baatyr str, 720003)

Number of respondents: 17

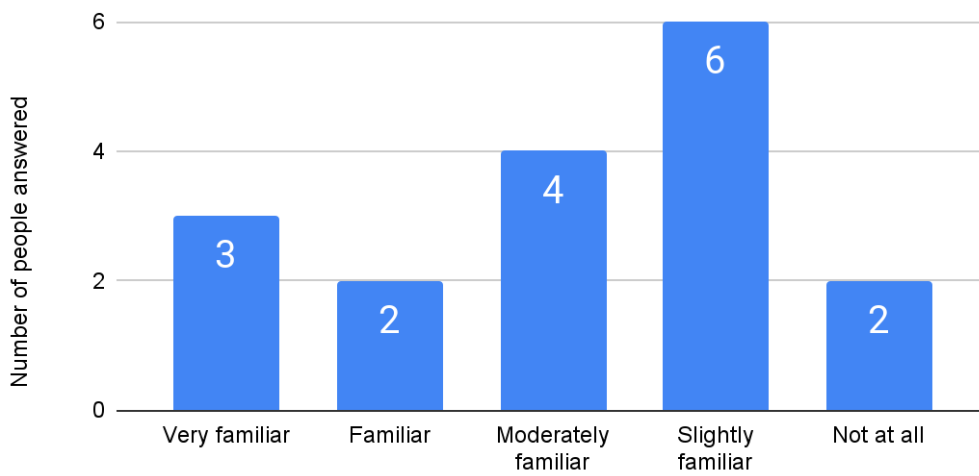

Questions of survey:

1. How familiar are you with the TNA process?
2. How familiar are you with the technologies prioritised in the TNA process for the sector you work in?
3. Do you think the private sector has been sufficiently involved in the TNA process, able to influence the decision making?
4. What are your expectations for this workshop?
5. How would you rate the prospects for new business opportunities surrounding the transition to sustainable 'climate technologies' in the Kyrgyz Republic?
6. To what extent do you think it is the Government's role and responsibility to enable the green transition in the Kyrgyz Republic?
7. How important do you see the role of international climate finance in enabling or de-risking private investment in climate technology projects in the Kyrgyz Republic?
8. Have you previously engaged in any of the sectoral working groups? If yes, which?

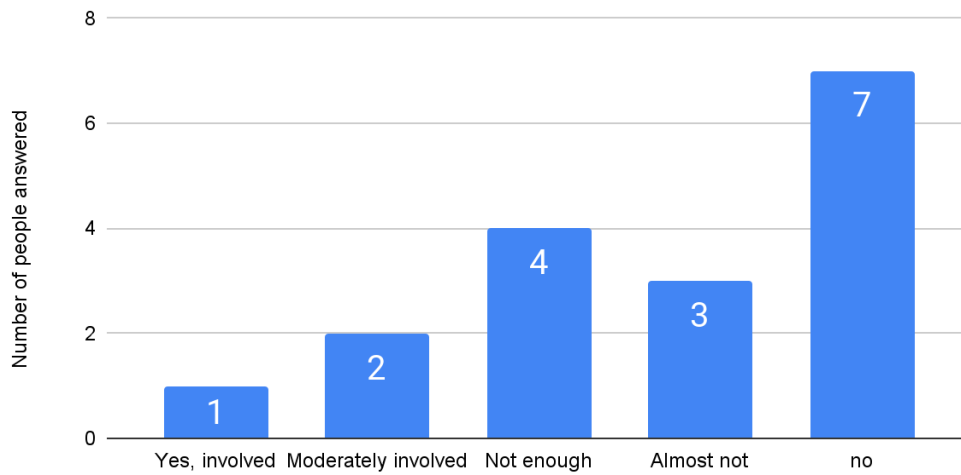

Q.1: How familiar are you with the TNA process?

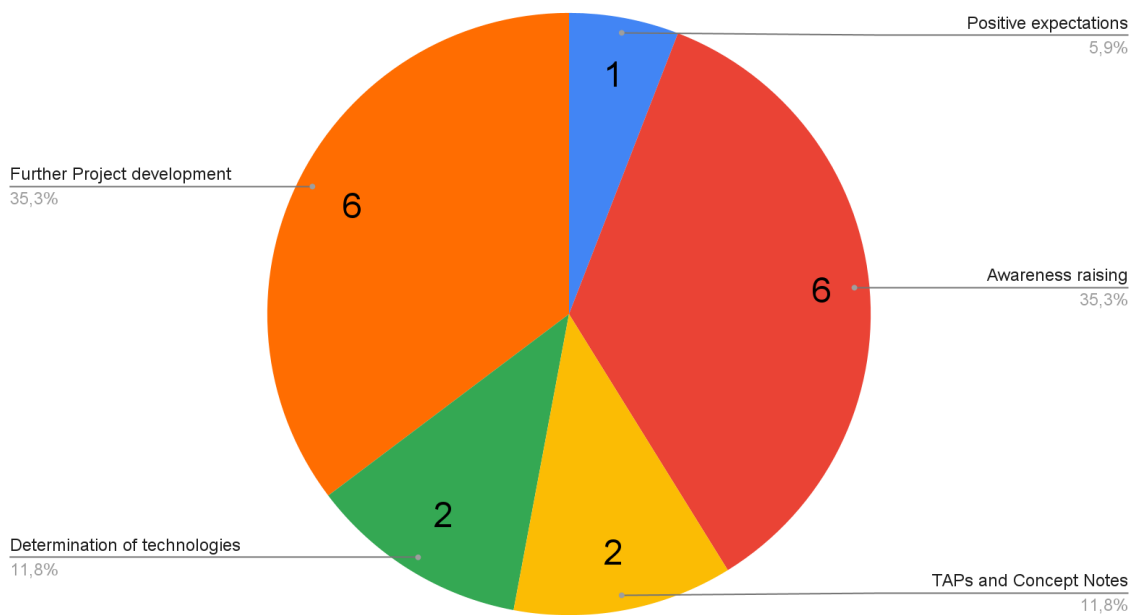

Q.2: How familiar are you with the technologies prioritised in the TNA process for the sector you work in?

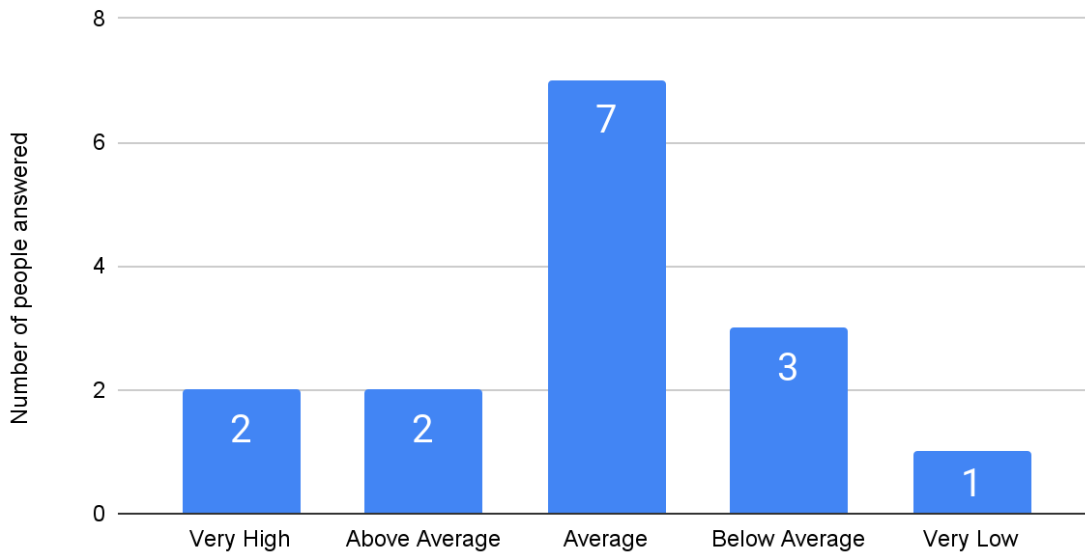

Q.3: Do you think the private sector has been sufficiently involved in the TNA process, able to influence the decision

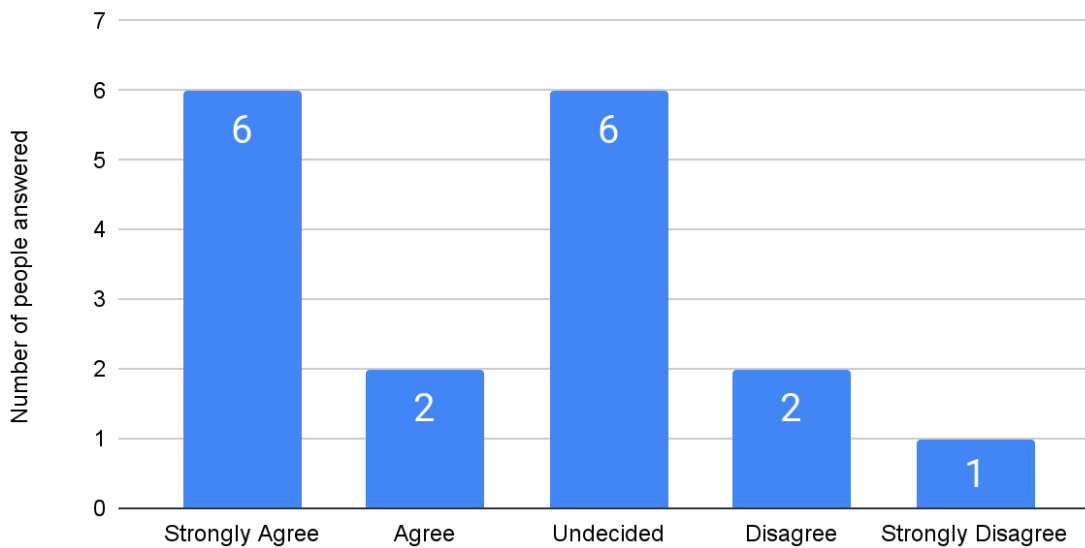

Q.4: What are your expectations for this workshop?

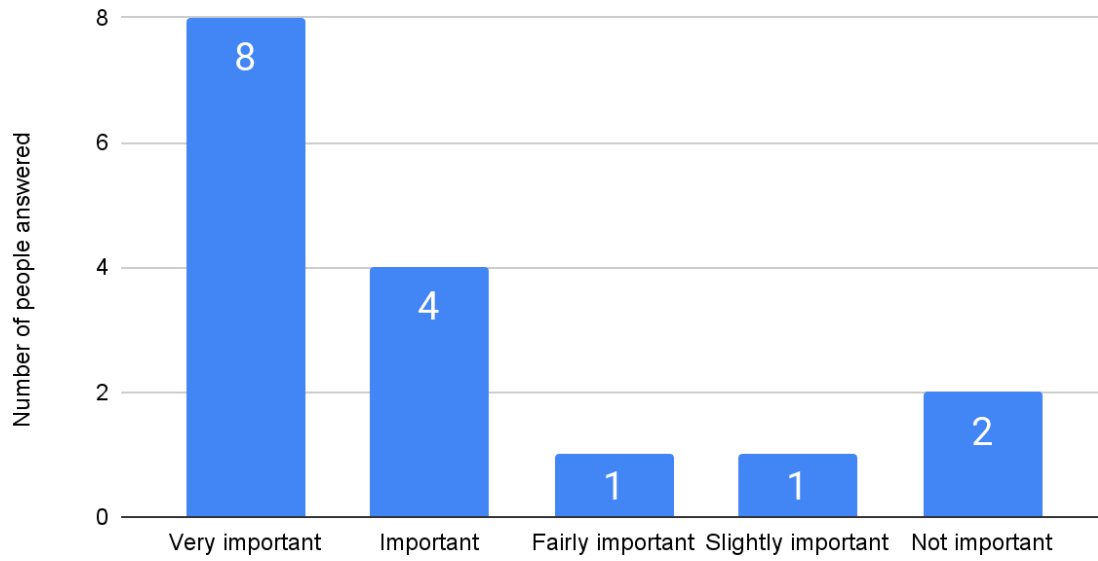

Q.5: How would you rate the prospects for new business opportunities surrounding the transition to sustainable 'climate technologies' in the Kyrgyz

Q.6: To what extent do you think it is the Government's role and responsibility to enable the green transition in the Kyrgyz Republic?

Q.7: How important to you see the role of international climate finance in enabling or de-risking private investment in climate technology projects in the

Q.3: Have you previously engaged in any of the sectoral working groups? If yes, which?
