■ Parties with DNA ■ Parties without DNA

DNA appointments over time

Number of Parties with Designated National Authorities since December 2023

■ Parties with DNA ■ New DNA Appointments ■ Parties without DNA

Since December 2023, the number of countries with a DNA has increased by over 80%.

National Arrangements

PACM

49 countries have submitted their Host Party Participation forms.

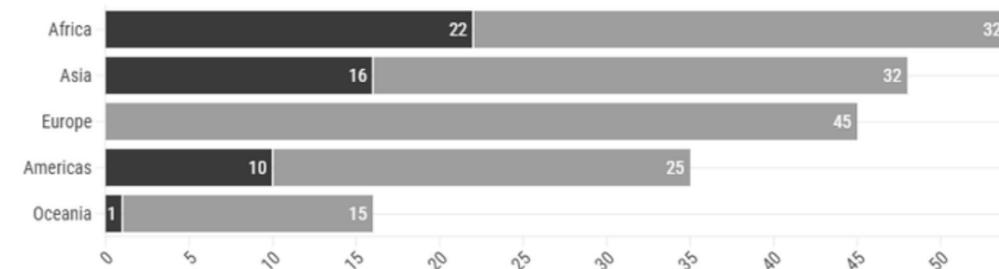

This form is prerequisite for any country's approval of CDM transitions and new PACM activities. With the extended deadline for CDM transition approval, host countries will also have more time to submit this form.

Number of Host Parties who have submitted the form since April 2024

■ Parties with submitted form ■ New submissions ■ Parties without submitted form

Since the last update in mid-January 2026, 5 countries (the Gambia, Guinea, Indonesia, Mauritius, Tanzania) have submitted their Host Party Participation forms.

Pipeline of PACM Activities

PACM

Alongside CDM transitions, activity proponents submit Prior Consideration Notifications for new PACM activities. Since mid-January, 10 new activities were proposed, bringing the total to 1,112.

10 notifications

FOR NEW ACTIVITIES

13.3 million tCO2e

ESTIMATED MITIGATION POTENTIAL PER YEAR¹

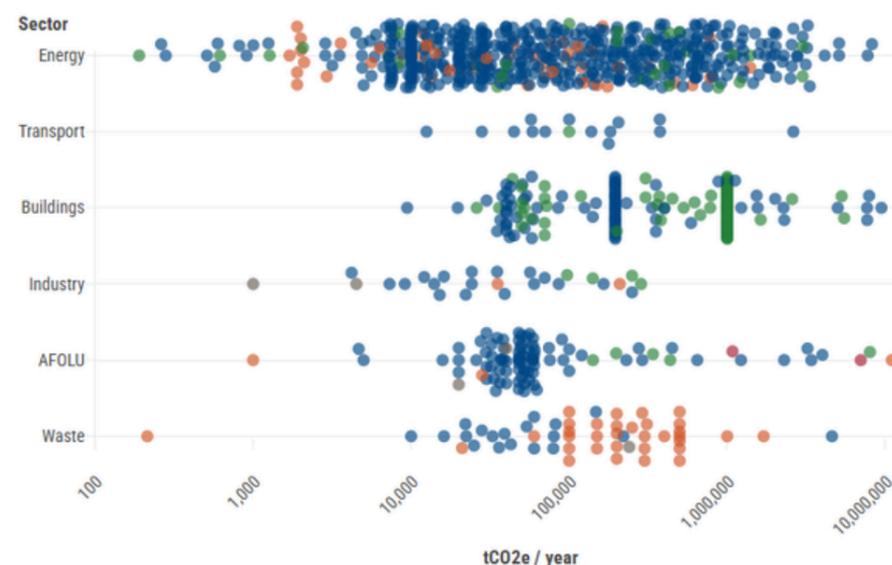

¹ These are tentative assessments by the project proponents. Across all 1,122 notifications, more than 1,037 million “credits” could be generated every year - for programmes this is a maximum value (around 548 million).

new projects under the JCM

Japan's cooperation through the JCM currently includes 31 partner countries - and Chile and Japan have recently updated their long-standing Article 6 Bilateral Agreement under the JCM

² This does not include signed "Memoranda" for cooperation under Japan's Joint Crediting Mechanism (JCM). In total, 106 agreements were signed between 62 different countries.

Bilateral Cooperation

A6.2

Initial reports covering an increasing number of cooperative approaches were submitted - alongside recommendations from expert reviews.

18 INITIAL REPORTS

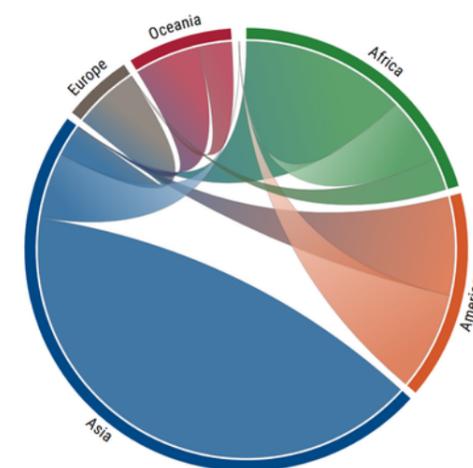

41 COOPERATIVE APPROACHES

Most approaches (28) for cooperation are under Japan's Joint Crediting Mechanism. Another 7 approaches currently have no partner country identified.

Some initial reports have undergone technical expert review (TER), with the first findings and recommendations now published.³

We can expect further reporting as the deadline for submissions for the Agreed Electronic Format (15 April) is approaching.
