

ARTICLE 6 PIPELINE

Launch webinar
Wednesday 18 March 2026

Welcome remarks

Karen Olsen

Carbon Market Coordinator

UNEP-CCC

Agenda

Welcome remarks - Karen Olsen, UNEP CCC (5 min)

UNEP Scene-setting remarks – Anne Olhoff, UNEP CCC (5 min)

UNFCCC Scene-setting remarks - James Grabert, UNFCCC Secretariat (5 min)

Keynote presentation: Status on implementation of Article 6 of the Paris Agreement and looking ahead
- Perumal Arumugam, UNFCCC Secretariat (10 min)

Launch of the Article 6 Pipeline Platform

- **Article 6 Pipeline background and vision** – Karen Olsen, UNEP-CCC (5 min)
 - **Article 6 Pipeline platform live demo** – Article 6 Pipeline team (18 min)
-

Q&A and Closing remarks (12 min)

Scene-setting remarks

Anne Olhoff

Director, UNEP Copenhagen
Climate Centre

James Grabert

Director, Mitigation Division
UNFCCC Secretariat

**Keynote
presentation:
Status on
implementation
of Article 6 of the
Paris Agreement
and looking ahead**

Perumal Arumugam

Manager, Mitigation Division

UNFCCC Secretariat

Article 6 Pipeline history and aim

The UNEP Copenhagen Climate Centre (formerly UNEP DTU Partnership and UNEP Risø Centre) set up and developed **the CDM Pipeline database since 2002**

In 2023, UNEP-CCC **transitioned the CDM Pipeline to the Article 6 Pipeline** and compiled data and information on new Article 6 activities in an Excel database

As the rules and activities develop, the data is **updated monthly** and visualized on the UNEP CCC website

The Article 6 Pipeline is now transformed and launched as an interactive and user-friendly **web-based platform**

The aim is to provide insights on the development of Article 6 activities and their impacts on countries' national climate targets (NDCs) and SDGs at the national and global level

Who is the Article 6 Pipeline for?

Who we serve

All Party and non-Party stakeholders, particularly developing countries along with policymakers, financial institutions, and climate professionals engaged in mitigation across sectors

What we do

Provide global knowledge and info hub for Article 6 implementation

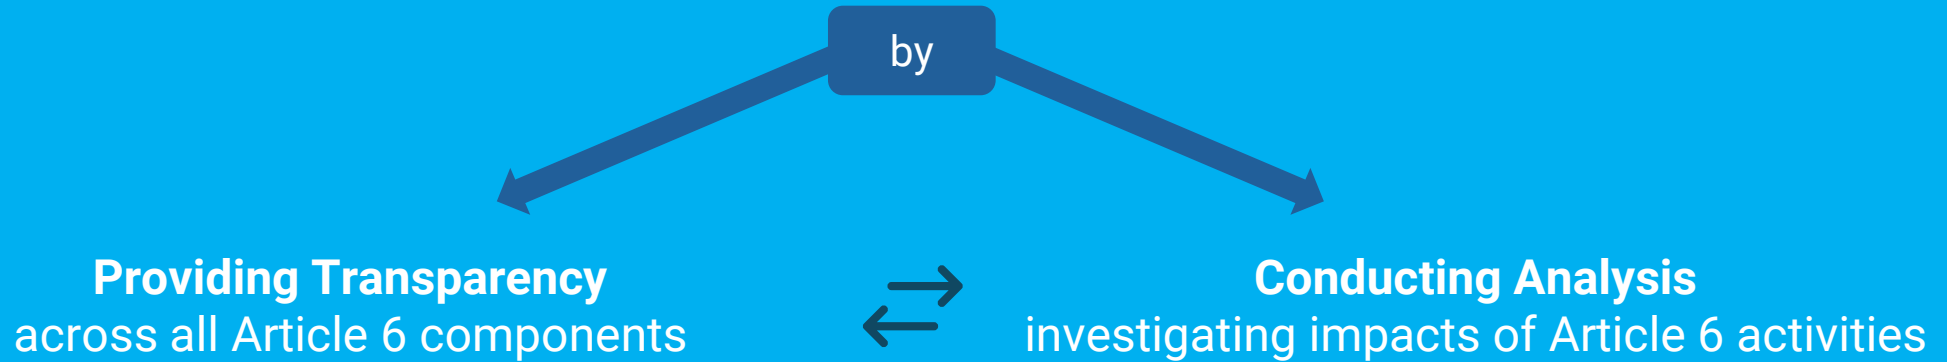

How to use

Functionalities of the Pipeline will be showcased in the following demo

Goal

What does the Article 6 Pipeline aim to achieve and how?

Promote Ambition, Integrity, and Sustainable Development through Article 6

The Article 6 Pipeline is an **open-source database** providing information and analysis based on a variety of sources - **mostly from the UNFCCC and UNEP-CCC's own research**, but also integrating data from other initiatives like **Climate Watch and the Net Zero Tracker**

Pipeline team

Jiajing Zhao,
Carbon Market
Specialist

Andi Sanusi,
Carbon Market
Programme Officer

Anna Giulia Murgia,
Carbon Market
Programme Officer

Key Terminology for the Platform Demo

- Article 6.2 cooperative approaches
- Article 6.4 mechanism – Paris Agreement Crediting Mechanism (PACM)
- Internationally Transferred Mitigation Outcomes (ITMOs) – e.g. GHG emission reductions

Additional terms are available in our [online glossary](#)

Structure and Content

Article 6 Pipeline Platform

Cooperation agreements, projects, issued units, emission levels and climate targets, sustainable development impacts, and more
can be explored across 4 main sections

Global Data

- Overviews clustered by countries, regions or other country groups (e.g. high income or LDCs)
- Detailed country and region pages linking Article 6 to national targets and priorities (e.g. NDCs and SDGs)

Activities

- Individual projects and programmes (e.g. details from the PDDs)
- Activities and their impacts across sectors, types, GHGs, and more (e.g. projects for agriculture, solar cookstoves or methane abatement)

Cooperation

- Tracing Article 6.2 and PACM activities throughout the activity cycles (e.g. SD Tool report, authorization, or issuances)
- Transactions and ultimate use of the units generated under each of the mechanisms (e.g. ITMOs, Overall mitigation)

Analysis Hub

- Analytical deep dives and explainers (e.g. climate impact from the CDM transition)
- Option to flexibly interact with the data to generate and download your own reports (various graphs and tables with filter options)

Upcoming features

Analysis Hub

Analytical deep dives and explainers; Option to flexibly interact with the data

Download function

Download the data in excel format and from different charts

A6 Pipeline account

Create an account to save favorite pages, charts, tables that you frequently use

Capacity Building

Library of explainers, guides, tools, that UNEP CCC, partners, and collaborators have produced

Q&A

Thank you!
